What **WE** DO

With more than 25 years' experience, Ede Powder Coatings has an exceptional reputation for quality and service.

As the leading powder coatings company in East Yorkshire, we can provide a full-service powder coatings facility for steel, aluminium and MDF products, from pre-treatment to delivery. All of our processes are fully ISO: 9002 compliant and all coatings are applied to manufacturer's recommendations and relevant British Standards by our highly skilled professionals.

Our 80,000 sq ft, purpose-built site has the capacity to handle large-scale projects but don't hesitate to get in touch with us for a quotation, whatever size job you have. Our pledge is to reply to all quotations within 24 hours, so why not call today to find out more about our competitively priced service?

Our **NEW** HOME

Following the acquisition of a major competitor, we can announce that we have now become the largest metal powder coating business in the region.

This acquisition more than doubles the size of the company and to allow us to accommodate the increased business that the takeover brings, we have moved our Beverley operations to Jenning Street, Hull.

Our metal pre-treatment plant and two spray lines and ovens are probably the most modern in the area. We also have plans to make several changes to the new facility to ensure that we continue to deliver the high quality products that our customers demand.

The new premises will allow us to process a wider range of jobs than ever before, so many more customers will be able to take advantage of the exceptionally high levels of service that we deliver, every time.

Same GREAT SERVICE

Even though we have moved premises our commitment to delivering a high quality service remains the same.

The new facility will allow us to continue to deliver to demanding timescales and we aim to reply to every request for a quote within 24 hours.

We are delighted to be able to offer the following powder coatings facilities:

Our effective management team have worked hard to ensure that quality control measures are as high as ever in the new facility.

- Coating of MDF products
- Application of Plastic Coating
- Larger oven capacity- up to 7.5 metres in length, 2.1 metres in height
- Full pre-treatment processes
- Full collection/ delivery services

Our new premises will enable us to offer a wide range of new services to existing and new customers.
